October 16

Interview with Dr. Alex Loyd

Dr. Alex Loyd

Creator of the Healing
Codes

Your Hidden Master Key to Success!

Darius: Hello and welcome everyone. I'm so sorry for that delay. I was having some interesting technology issues. So do this for us: let me know you can hear me okay and that everything's alright. I am so sorry. Now, Astrid, your PC is fine. Just let me know that everyone can hear me and then we will get started. This is just an interesting thing and I believe there are so many people climbing on and the energy of this is so powerful. I always say we never know what's going to happen with the technology when we have a powerful session coming up.

Now, we're going to be talking about something I believe that is astounding. If you've ever been exposed to technologies and things that really unlock the truth about our being, you'll probably be like me and be one of those people that gets chills and gets really excited about what's possible, about the unlimited future that's possible for so many of us on the planet.

And today we're going to be talking about what's called the master key and it's the master key to success. And we're going to be talking about exactly what this is and this discovery that we really are what's called three-part beings, that we have literally these three parts. And if any one of these parts is not unlocked, as I will say in my language, or really opened into the right frequency, or really turned on in essence, then the healing, the transformation, the things we want does not take place.

Now, the other side of this... the beauty is that if we understand how to unlock these three parts, if we understand how we're these three-part beings and we begin to live our life from that, then we can create that amazing healing, we can create that miraculous transformation.

We're going to be talking about the step-by-step process to systematically switch off up to 95% of modern disease. We're also going to talk about how to prevent future and internal stress and disease, how to unlock your healing potential, how to awaken your spirit, how to rewire your financial thermostat and how to create a new conscious blueprint, and it can be very, very quick.

Our guest today, is Dr. Alexander Loyd, who is a bestselling author and featured live on many different forums including NBC, ABC, CBS, Fox, PBS news programs as an expert in healing not just the outward condition but the source, the underlying root of illness and disease and issues related to failure and success.

He was the subject of a PBS special about the Healing Codes and the healing of the source of problems versus managing symptoms. the Healing Codes has been seen on *USA Today*, *People*, *Time Magazine*, as well as many other print and media publications and Dr. Alexander Loyd literally travels all over the world sharing this incredible information even on the radio, internet and TV as well.

Dr. Loyd's groundbreaking research in the area of deprogramming and reprogramming cellular memories and the underlying source of all issues has led to something really miraculous beyond the Healing Codes. So some of you may say: 'Well, Darius, I've use them. I've use the Healing Codes, I've heard of about the Healing Codes.' This is something beyond even that.

So we're going to be talking about the latest discovery and how it can affect you and what you can do today.

Dr. Alexander Loyd has a PhD in Psychology, a MD doctored in natural medicine as well. He was in Leiper's Fork, Tennessee with his wife Hope and his sons Larry and George.

So let's give Dr. Alexander Loyd just a huge amount of love and welcome for patiently awaiting through those technical issues. Dr. Alex, welcome back.

Alex: Thank you so much, Darius. You and I have done things for a while now and it feels a little bit like coming home when I'm with you. Thank you for having me back again.

Darius: Yeah, a lot of memories and a huge number of lives transformed. And, you know, I would think with the incredible success the Healing Codes has had, I mean just the chronicle of people who've been healed, released, saved, that there wouldn't be anything else. But in actuality you came to this and said: 'There's an incredible discovery called the master key.' Where did this come from and how did this happen?

Alex: Yeah. I appreciate that you giving me the opportunity to answer that. You know, the Healing Codes is kind of what I'm known for, but the master key really started way before the Healing Codes and continued way after the discovery of the Healing Codes.

As I've shared on your program, the Healing Codes kind of saved my wife. She had been diagnosed with a very severe depression and was very depressed for 12 years. But what we're going to talk about today is more what saved me rather than my wife, and it starts way before the Healing Codes. It starts about 25 years ago. And I felt like at that time everything in my life I was failing at. Tracy was depressed. You know, if you've heard me on this program before you know that story.

My wife was horribly depressed and there wasn't anything I could do about it. I was failing at my work. At that time, I worked with teenagers and their parents trying to get them on the right path and keep them off from the wrong path, and having good relationships with their parents and teachers and all that sort of thing, and I was failing at my work.

I was at the point of bankruptcy. I was miserable. I mean, any area you could name in my life I felt like I was completely failing and on the brink of something horrible. And I remember vividly one of the thoughts that went through my head at that time, Darius, and excuse my language, I'm just being honest here, but how did I screw this up so fast? I mean, I was in my twenties and I was thinking: 'Okay, I understand midlife crisis and stuff like that, but I'm in my twenties and I've already messed up every significant area of my life. How did I do that so fast?'

And I started in desperation searching, and I came to believe through some medical research and through some ancient manuscripts too... I came to believe that we had a second immune system, a hidden immune system, and that this hidden nonphysical immune system controlled our physical immune system that we're all familiar with. And I believed, okay, if I can ever find this...

And so I started searching for it 25 years ago, way before the Healing Codes. And so if I could ever find this and figure out how to turn it on, you know, maybe I can turn my life around and my career and all of these things that were failing in my life.

And the more I studied, I kept learning more and more and I kept kind of refining what I believed the second immune system was. And what it came down to - and this was over a period of years - but what it came down to is if there we're a three-part being, as you said when you introduced me.

Darius: Right.

Alex: We are not just a physical body; we are a body, we have a mind and we have a spirit. And the amazing thing is that each of those speak a different language or have a different key or master key - and that's where the name came from, is that each of those have a different language or key that either locks them up or unlocks them for health and happiness and flow and energy, or blocks energy and stops the flow and causes illness and disease and all of that.

So for years I searched, and what I found was that the key, the master key, for the spirit is images. It's pictures...

Darius: Holy Mackerel.

Alex: Which is the universal language.

Darius: Yes.

Alex: If you're in France and you don't know French and you're starving to death, you don't try to say words to the French people. I mean, you might try that first, but let's say you can't find anybody that understand language. Well, finally you give that up. And what you do? You start painting pictures with your body. You act like you've got a fork in your hand and you're trying to put something in your mouth and you're rubbing your stomach like you're really hungry and need something to eat. And after a few seconds of this... I got back from a European tour this summer where I was lecturing some over there and I've tried that out, you know, just for fun.

Darius: Right.

Alex: And within a few seconds they knew exactly what I meant without ever saying a word, okay. It's the universal language and it's the language of our unconscious and subconscious. According to Pierce Howard, PhD in his bestseller *The Owner's Manual for the Brain*, all data is encoded and recalled in the form of images.

So images are the language of the spirit, but what images? Which ones lock it up and which ones unlock it for health and healing and freedom and all that?

I found that the language of the mind, the conscious mind, will and emotions is words, and that comes out of Roger Sperry's Nobel Prize-winning research in 1972, his split brain research, where he found with epileptic patients that left brain was words and linear and right brain was images and conceptual and special and all that. And we've known that since then and you can read all kinds of great stuff about that.

But the language of the conscious mind and logic and reasoning is words. But which words? And which words cause problems and which words can unlock those problems?

And then the language of the body is frequency.

Darius: Oh.

Alex: And the right frequency can make human DNA heal and unwind and relax and de-stress in a test tube, and the wrong energy can make human DNA... a negative frequency can make human DNA curl up and go into self-protection, almost like if someone who's attacking you and you instead of fighting we're trying to protect yourself. You'd put your arms up, you know. They've videoed cells doing that when they receive a certain negative frequency, and when they receive the positive one it opens up kind of like: 'Oh yeah, that's what I need. Please come in.' And then it actually heals the DNA.

So for years - a couple of decades actually - I searched all over the world to try to find the exact perfect images, words, frequencies that will unlock every single time and on demand the heart... I'm sorry, the heart spirit. Actually the way we've been talking, the spirit, the mind, and the body. And eventually I found them all.

And the story... I'll keep this as brief as I can, but you need to understand a little bit how miraculous all of this is. Up through the Middle Ages... The frequency for the body up through the Middle Ages, our actual musical notes, were on a different scale. Middle C on that musical scale up through the Middle Ages was known to be an extremely healing frequency and tone.

Now, they didn't use the word 'frequency' then; they used the word 'tone', and I would arrange songs and chants and all, and people would hum and all kinds of things using that exact middle C tone for healing and for de-stressing. And in the Middle Ages a fascinating thing happened. That musical scale disappeared off the face of the earth and a totally new musical scale, almost like it was some great conspiracy, appeared out of nowhere, which is the one that we use today, and there was no almost even no evidence that the other one had ever even existed. It's almost like someone intentionally wanted to wipe it off the face of the earth.

And in the 1980s, an Italian doctor discovered ancient manuscripts talking about the old musical scale and that middle C 528 Hz frequency. So he started as a doctor testing it in the lab and then had miraculous results with it. Had other doctors test it. They had miraculous results with it. And he ended up calling it two things: (1) the miracle frequency, because they found that it would literally heal human DNA in a test tube, and the love frequency. They became convinced that it was the actual physical frequency of love.

Darius: Wow.

Alex: And since... I believe it was 1981 or 1982 he discovered that, and since then many other scientists have tested that, confirmed it, and found other miraculous uses for that particular frequency. A number of years ago...

So that's the frequency. The words... I had a lady come to me a number of years ago - probably eight years ago - and she said: 'Dr. Loyd, you're probably not going to believe this, okay.' And you've got to ask yourself: of all the people in the world why did she come to me? I don't know.

Darius: I don't know.

Alex: But she did. Of all the people in the world she came to me. And here's what she said: 'You're probably not going to believe this, but I have a young child way below ten,' - I'm not going to tell you exactly, and you'll understand why in a minute, but way below ten. And she said: 'Over a year ago, our child came to us in the morning and said: 'Hey mom, hey dad, you'll never believe what happened to me last night.' And they said: 'Well, what?' Because they knew their son hadn't left the house, you know, and had slept in his room. So they're really curious and the child said: 'I had a dream, only it wasn't a dream, it was real.' And they said kind of hesitatingly: 'Okay. Well, what was this dream that wasn't a dream?' And he said: 'Well, God or the source of everything came to me and took me back in history to all these things that have happened in the past. Only it was as if I was watching them happen right now rather than in the past.'

Darius: Wow.

Alex: And some of them were famous and some weren't famous. And then the boy said: 'This entity, god, source, love was totally loving, wonderful, kind. I felt immediately at home, warm, all that sort of thing.' And actually the boy did not say it was God or source; the boy said it was light, okay?

And so anyway the boy went on and said at the end of the evening the light gave him a gift, and the gift was a series of words in an exact order, and told the boy: 'These are very healing words when you say them and use them in the sequence that I gave them to you. And I'm giving them to you as a healing gift, okay?'

So they say: 'Okay. Well, where are the places that you went and what did you observe?' And so the boy gives them details of all these historical events from the past and a whole bunch of them, Darius, they didn't know. So they called the boy's teachers, they called the boy's babysitters, they call anyone who's had contact with the boy - the parents of his best friends, etc. - and no one had told the boy these facts about these events in history. In fact, a lot of them they had to look up because nobody had a clue that that ever even happened, and every single fact the boy said was exactly correct.

Darius: Oh my gosh. I'm getting chills. That's all I can say.

Alex: Yeah.

Darius: I'm getting chills. And I just wrote somebody on my team and I said: 'You guys have to hear this. I'm just riveted.'

I want to hear what people are saying and what people are feeling. This is absolutely... I'm loving every second. Wow. Okay, keep going Dr. Alex. I'm sorry.

Alex: Okay. And so she said: 'Okay.' Oh, and by the way, one parent in the household believed in God, the other one didn't. It was not a religious home or anything if you're thinking that. It wasn't.

So the family used these words in a particular way, in a particular specific sequence and order for the next year and experienced miracle after miracle. And then at the end of that year - actually for several months before - they had been thinking: 'You know, we've got to share this but we don't know how to do that.'

And how it happened I will never know, I don't guess, because she couldn't tell me. But somehow she found me and became convinced she was supposed to give the words to me for me to test them and if I found them to be effective, to help as many people as I could. And she said I have two conditions: (1) I do not ever want a penny from this in any way, shape, form or fashion and (2) I don't ever want the identity of my son made public because whether they're great or whether people think they're terrible I don't want him having to deal with that. He was a very young child at that time.

So I agreed to both. I tested them myself for the next year-and-a-half, found them to be absolutely incredibly powerful every single time virtually, and then I found the third piece, which was the exact perfect images, and it was actually the images that corresponded to the perfect words, okay.

Darius: Okay.

Alex: And in an exact particular sequence.

Darius: Wow.

Alex: So then I had all three pieces.

Darius: Okay.

Alex: I had the frequency for the body, the words for the mind, and the images for the spirit, but I had to figure out okay, but how do we deliver this and how do we deliver it in a way that's effective and effective for every single person?

So I chose to do that with a binaural base. And binaural has been around since the fifties. In fact, you can Google and you'll find hundreds of binaural programs that cost hundreds of dollars. You'll find some recordings free on the internet. You'll find whole companies built on binaurals because they de-stress your brain, okay? And if you de-stress your brain, you de-stress everything else.

But the main thing about binaurals is that they allow you to slip past your conscious mind and the protection of your unconscious mind that keeps things from healing, because your unconscious mind protects memories that are trauma memories, because they serve as an early warning defense system against another similar thing happening in the future. And the binaural, the way it works in the brain allows you to slip past that.

Now, if you've never heard of binaurals, Dr. Oz recently had as his guest Dr. Eben Alexander, a neurosurgeon from Harvard, and they spent most of the show talking about the unbelievable benefits of just binaurals and nothing else.

Darius: Wow.

Alex: In fact, a direct quote from Dr. Oz and Dr. Alexander on that show is that they've seen enormous benefit from many of their patients, and what it does is allows you to get to a place of relaxation and de-stressing that is not possible to get to on your own and even with hours a day of meditation. In fact, even meditation masters, yogi masters are turning to binaurals to get to deeper relaxation than they've ever been able to get to in deeper levels of meditation.

And then the other thing that I found that we needed to integrate was a theta accelerator which puts your brain into a partial theta state, which is an anti-stress state, okay.

So that's where it comes from and it took me 15 years to find all the pieces and then it took me the last five-and-a-half years with a team of computer experts, engineers, people who can manufacture tones and put things together from this file on a computer to this file on a computer and can overlay this onto this.

Darius: Right, right.

Alex: And so we created audio and video recordings, tested them, went back and reengineered, tested them, went back and reengineered, tested them again, went back and reengineered, and five-and-a-half years later and after spending a small fortune, we developed the perfect master key product that works, in my experience, for every single person and is absolutely unbelievable. And what I had believed existed more than 20 years ago it activates all levels of our being...

Darius: Wow.

Alex: Our body, mind, spirit, and is a one-of-a-kind program. There's nothing else that exist right now like this.

Darius: Wow. Wow. It just is incredible. So what I've got is that we need three things sort of in conjunction.

Alex: Right.

Darius: Three things are happening with this. There's a sound component and then there's a words component and there's an images component, and all three of those actually work in unison, are working together as you go through some of these different processes, and that actually is the master key to how we function, to how we really unlock healing ability, success, happiness, joy and everything else.

Alex: That's right. That's absolutely right.

Darius: Let's talk about this, I mean, Dr. Alex. How does this apply to success? What were some of the things you saw... Or how does it, let's say, take an area of health and maybe we can take health, we can take relationships and maybe just success and

how each of these kind of apply in those areas.

Alex: Alright. Well, before I go there, if I could, let me explain a little bit more of what the actual master key is.

Darius: Sure. Absolutely.

Alex: Is that okay?

Darius: Oh, yeah.

Alex: Okay. So what the master key is a whole bunch of recordings. I think there's 12 or 14 audios, four or five or six videos. All of them are high-definition digital quality, engineered from scratch from the ground up, and each recording has a different combination...

Darius: Combination, okay.

Alex: Of the 528 love frequency and the exact words, the exact images, in an exact specific sequence with a binaural base and a theta accelerator to put your brain into a relaxed state instead of a stress state. And each recording is a little bit different. So you start with one, go to the next one, go the next one. But unlike a number of companies that are out there it's not, okay, start with this one and then when you're done with that one come back and buy the next one, and then when you're done with that one, come back and buy the next one.

I'm not interested in that. We give you a whole bunch of them and you go from one to the next, to the next, to the next, to the next, but you don't have to come back and keep buying all those, okay. There's I think over 140 minutes of high-definition video and way more than that of the audio.

So here's how it works. You put the headphones on and push PLAY. That's it. And you sit back and relax and let it unlock your spirit, your mind, your body for ultimate healing, for self-healing. Your body knows how to heal, okay. According to Dr. Caroline Leaf in her bestselling book *Who Switched Off My Brain?* We don't have any mechanisms in our brain, nervous system or body for the negative. Not one. Every mechanism is for the positive. When something negative happens, it's always a malfunction. It's always because something is gunking up the works, okay.

So you push PLAY and the 528 miracle frequency starts to unlock, de-stress your cells. That's the one that's been found in the lab to heal human DNA. Those exact perfect words in sequence are done for you or you can do them yourself, it's up to you. There's recordings of both. Whichever way you'd like to have it. And those words one right after another...

Darius: Wow.

Alex: De-stress your mind and they neutralize those negative thought patterns and negative feelings and negative emotions that you have that you can't seem to make go away. They neutralize those by pushing PLAY. And then the exact perfect images... You can do the image yourself in your own mind or you can push PLAY on one the ones that has video and it will show you the images and so you can look at

the screen, okay. But all of that is included and with the binaural base that takes you to deeper levels of relaxation than you can get to on your own and the theta accelerator that de-stresses your brain.

And we put it all one package for significantly less than most of the companies who are selling things like this. Now, there's nothing like this, but who are just selling binaurals only. We give you way more than they give you. They charge way more than we do and we give you like six times as many recordings. They keep wanting you to come back and buy another one and buy another one and buy another one and buy another one, and we're not into that.

Darius: I'm just perplexed at the stories of how these different elements all came together. I mean, from the story of little girl having the dream from, you know, the frequencies being sort of wiped off the map, from the images that really stir our soul and consciousness, and then what can happen bringing all of that stuff together. I want to get into some of those stories and some of the things you've seen.

Alex: Right.

Darius: But something that kind of was interesting to me and it's incredible the research your team has done, because you talked a lot about chaotic frequencies.

Alex: Right.

Darius: And these destructive cellular memories and how we literally have 10,000 thoughts flashing through our mind and 75% for many of us are negative.

Alex: That's right.

Darius: What is this doing in our body? What's going on with that frequency to our DNA?

Alex: Yeah. Absolutely. The negative cellular memories create massive internal chaotic frequencies...

Darius: Okay.

Alex: And they spread to the mind and they spread to the body. If we have negative thoughts and emotions and actions and behaviors, those may come from the unconscious cellular memories, but they also spread back to the unconscious cellular memories and make them worse, and they also spread to the body and cause that to be worse.

If we have problems in our body that maybe from genetic or physical issues... Now, but even the genetic or physical in our ancestry somewhere comes from stress and an internal issue, but a person can have a physical issue today that's genetic that doesn't come from an issue in their life; it comes from something in their ancestry. So what does that person do?

Well, when that person has that negative genetic physical issue, it spreads chaotic frequencies to both the mind, the unconsciousness and the conscious mind, what I call the spirit and the mind. So even though these are separate they all overlap and they all affect each other. So the only way to be in perfect health and healing mode

or in perfect success and achievement mode is to have all three parts of your being in light and love and positive frequencies and all three of them in harmony with each other. So what happens a lot of times... Let's say a person does a binaural if it's a binaural only.

Darius: Right.

Alex: It de-stresses their brain and they feel better, they feel more relaxed, they have more energy, but they haven't touched their conscious thoughts or emotions.

Darius: Right.

Alex: They haven't touched their internal unconsciousness and subconscious issues, what I call the issues of the heart, that may have produce the stress in their brain to begin with.

Well, what that means is even though they feel a whole lot better right off the bat, it's probably going to go backwards after a while, because they haven't healed the source, okay. Affirmations have been huge for about 20 years now, maybe longer than that, but what the studies show - the double blind studies at universities - and we didn't have those until about eight years ago, but now we've had several... What they show is that for people who already believe that they have self-worth and are good and capable and can be successful and stuff like that, that affirmations make them feel even more that way. But for people who don't already believe those things and feel that way, it literally makes things worse.

Darius: Yeah, yeah. I mean, this is true. One of my mentors that worked in the mind for about 40 years told me that to the side. He said: 'Don't tell people to do affirmations.' And really I never have. I've never really ever pushed that because I remember what he told me. He said: 'It will make people feel worse unless they get to the root.' That root signal, as you talk about, that root signal frequency that they're putting off actually goes stronger like someone turning up the volume.

Alex: Right.

Darius: Saying: 'Okay, you're trying to drown me out? I'm going to really turn it louder,' and it becomes even stronger in their body and in their cells. So a very, very good point. I just wanted to share that.

Alex: Yeah, and the reason for that is because for that person saying that affirmation is a lie.

Darius: Yes.

Alex: And their unconscious mind treats it as if they're saying a lie every time they say the affirmation. And saying a lie at something you believe is a lie creates massive stress, and that's why for most people when they do affirmations it causes a stress spike in the brain rather than making things better.

Darius: Wow.

Alex: Now, some people are probably wondering too, because they've heard me talk about the Healing Codes.

Darius: Yes.

Alex: Well, how is this different? Well, it's night and day different. First of all the Healing Codes is anything but pushbutton. Let me give you the basics. The Healing Codes does one thing and does it better than anything I know of on the planet and that is find and neutralize destructive cellular memories, okay?

Darius: Okay.

Alex: Now, that is your spirit or spiritual heart as I call it of the three things we've been talking about today. The Healing Codes really doesn't address the mind or the body.

Now, when you heal those cellular memories, yes it can have an effect and bleed over into the mind and body, but it's much harder work and takes longer because you're not addressing the other two areas and unlocking them and getting them in harmony with the heart and spirit right off the bat.

What works much better is to do both; to do the master key, which unlocks the body, mind and spirit - all three for healing - and to eliminate those chaotic frequencies, and then to specifically find and heal those underlying cellular memories as well. But starting with the master key is wonderful and that may be all that you ever need. And we're hearing from a lot of people that it is.

So back to your original question: how would you apply this to success?

Darius: Right.

Alex: It is so easy. You know, I've just started talking about this because we've just released it after all these years and I'm not used to it yet, Darius. And when I say these things I almost have a little double check in my own mind. It's like: 'Wait a minute, it can't be that easy.' But it is. It is.

So here's what you do. Let's say you're not successful in some area of your life that you want to be.

Darius: Okay.

Alex: Or you're successful but you'd like to take to another level, okay. All you do is you pray about that issue – a simple sincere prayer from your heart. It can be 15 seconds, it can be 15 minutes, whatever you want to do. Or you can just pray while you do the master key. But say a simple, sincere prayer from your heart about whatever that issue is – 'I'm not succeeding in this area and I would really like to, so I would ask that my spirit, mind and body all be unlocked for healing and for success and all three of them also in harmony with each other, with positive frequencies and positive thoughts and feelings and positive unconscious data and memories.' And then you put your headphones on and push PLAY and that's it, okay.

Now, one thing I would advise is before you do that, rate from zero to ten that thing that's a failure right now in your life or that's successful but that you want to take it to

another level. Rate that, how you feel about it, your thoughts, feelings and emotions and belief. And then when you're done with the master key and press STOP, now go back and rate it. And I'll guarantee you're going to feel different, okay.

Well, later that day or the next day put the headphones on, say your prayer again, rate it again, go back to your little rating thing to see where those things are, push PLAY. Relax while the recordings are going. I mean, they're very comfortable. That's one thing that Dr. Oz and Alexander talked about about the binaurals is it is a soothing effect listening to these recordings. And it is. It's very, very soothing and comfortable and pleasing. It feels good to listen to them.

And then when you pushed STOP, go back and rate those things again. And what you're going to find as those things heal and as your spirit, mind and body come into alignment and as your spirit, mind and body each unlock and start healing themselves...

Darius: Okay.

Alex: What you're going to find is those negative things that have been blocking you from success are melting away.

Darius: Wow.

Alex: And before you know it you're going to think about that area of your life and you're going to not try to think; you're going to naturally think: 'Hey, I can do this. Let's start today. I'm ready to go, man. This is going to be a no-brainer. I'm going to get this done. I'm going to go out there and do it. I know there's going to be problems that come up. Big deal. I'm going to move right past them and I know everything is going to come into place the way it needs to, and it may take a little time, it may take longer. That really doesn't matter. I'm going to go out here and do it, even if it's for the first time in my life.'

And you actually feel the power to do it. You feel the positive feelings. You feel the positive thoughts and emotions. You feel a literal power. You feel strength in your body, mind and spirit that you haven't felt before and you go out and do it and that's...

Darius: Is this the way, Dr. Alex, we're designed to live? I mean, is this kind of like the way that spiritually we were really designed to live before?

Alex: Yeah.

Darius: You know, maybe that...

Alex: Yeah, I believe so. I believe a really good parallel - and I've used this with the Healing Codes some, but I think this fits much better here.

Darius: Okay.

Alex: I think a really good way to look at it is almost like putting an antivirus program on your computer when your computer's not working right. And what happens? You put that program on and then a little icon comes up on your screen. You click on the

icon and it asks you: 'Okay, do you want to install this antivirus program or do you not?' So what do you do? Are you lifting 500 pounds? Are you running laps around the house? No. You click and say: 'Yes, I want to install.' Then you install it and another thing comes up and says: 'Okay, would you like to run it now?'

Darius: Okay.

Alex: Well, you're not going out and building a house. You're not going out and taking months or years to do something that's very, very difficult or get a degree or anything like that. You're pushing a button on the computer that says: 'Yes, please run it now and fix my computer.'

This works in a very similar way. It's what I call human hard drive technology. You put the headphones on, you say your prayer - this is what I am struggling with and this is what I would ask to have happen...

Darius: Okay.

Alex: And so I would like my chaotic hertz in my spirit turn to positive energy. I would like the chaotic hertz in my mind turn to positive energy. I would like the chaotic hertz in my body turn to positive energy, and I would like my spirit, mind and body, all three, aligned with each other in harmony and positive energy. And press PLAY.

And that's it. And you relax for either 10 minutes or 20 minutes. You can do it while you're out taking a walk if you can do it. Some people have done it while they're asleep at night and just let it play all night in the room. Some people do it while they're doing housework and just let it play in the background while they're doing everything they need to do that day. Some people do it in a very meditative state or they're not doing anything else and they're just really focused on relaxing and let is soaked in. Any of those work. But it comes down to pushing a button, the PLAY button.

Darius: Wow. Okay. We've got a question from quite a few people, different questions coming in. I want to kind of go through and I want also for people that have questions about have you seen certain results in this area or in this area... let's maybe we can share different things.

Alex: Sure.

Darius: Mary is wondering about the sound element. What happens when the sound and the words sort of are exposed in our body or to just our... I guess our spirit or even just our vibration as beings? What's happening in our body from a physical perspective? Is it unfurling DNA?

Alex: Sure.

Darius: Is it opening up? Okay. Just kind of walk through that. I'm particularly interested in what the words are doing as well, because that's also another interesting thing.

Alex: They really all work the same way.

Darius: Okay.

Alex: In probably 8th Grade Physics we are first exposed to how energy works, and this all comes from 1905, Albert Einstein, the Theory of Relativity.

Darius: Okay.

Alex: And since then everything has changed on the basis of energy, and everything boils down to energy, and we understand that. Energy is represented as a wave, a frequency wave, a sine wave, and everything that has a frequency has a little bit of a different wave, okay.

An MRI and CT scan do not take an internal picture of the body. They're programed with hundreds of energy frequencies and they scan the body to see what frequencies are picked up. And if the MRI picks up the frequency of a diseased liver cell, it makes a dark spot on the liver on the picture in the spot where it picked up that frequency.

If the person does some treatment and comes back and has another MRI and the tumor is gone, then it will not pick up a diseased liver cell, it'll pick up the frequency of a healthy liver cell, and so on this MRI picture there will not be a dark spot and the doctor will be all happy and come out and say: 'Oh, see the one from a year ago and the one now? The tumor's gone.' And everybody rejoices, okay. But it wasn't taking an internal picture; it was scanning for frequencies.

Darius: Wow.

Alex: So in about 8th Grade Physics the question comes up: okay, well, what if you have a destructive frequency? How do you change a frequency? And especially how do you change a destructive frequency to one that is not destructive?

And if you don't believe this, go online or look in an 8th Grade Physics book and you'll find it. You expose or hit that particular frequency with an opposite frequency, the exact opposite frequency for that frequency, okay. And when you do that, it neutralizes the negative frequency and creates a new frequency sine wave pattern that's not destructive anymore.

Darius: Wow.

Alex: Okay? Now, depending on how physical the thing is the longer it can take to do that, and when you're talking about physical things, that brings in a whole other element. But we're not talking about physical things. We're talking about the nonphysical source of all this stuff, which is always energy.

So the words are like a master key positive frequency for all negative thoughts, emotions, beliefs and actions. The images are like a master key positive frequency for all unconscious cellular beliefs that are fear-based. The 528 love frequency is like the master key frequency for negative physical frequency, okay. So that's where...

Darius: So these are like three...

Alex: The name master key came from.

Darius: Sorry for jumping in. We've got a bunch of questions. Someone says: 'These are like three keys then?'

Alex: That's right.

Darius: Well, three keys to different locks in our body, in our spiritual structure, in our biology chemistry and just in our, you know...

Alex: That's right.

Darius: As spiritual beings. Okay.

Alex: That's right. But they're not just a key; they're master key. A master key will unlock any door in that house. The master key in the mind... that specific set of words will unlock any negative emotion, thought pattern, belief, or action in the mind. The images will do any one in the unconscious mind. The 528 will do any one in the body. So that's why it's master key not just key.

Darius: Wow. Wow. Wow. Okay, we've got a question coming in from Julie who's asking about things that you've seen with just success and joy and changes in that aspect to someone's life. She's been having a lot of challenges just really being joyful and happy.

Alex: Yeah, it's unbelievable. We did two test groups over those five-and-a-half years, and combining the two test groups... - and both of these surveys were anonymous. So people said exactly what they thought. There was nothing held back because they knew they could not be identified in any way, okay.

And with people that we did the test protocol on for a period of time, they rated the effectiveness of the master key... - and all of them have different issues. There's some physical, some mental, some spiritual. Everything across the board. They're all different ages, all different ethnicities, even from different countries, okay. And the rating of the master key by all of those people combined was a 4.95 out of 5 as far as the effectiveness.

We asked them please give us your negative comments, constructive criticism how we can improve it, because we haven't released it yet, so we can still tweak this thing and change it. Not one person had a single negative comment. Every one of them raved about it and said it's perfect exactly the way it is; it was wonderful; it's comfortable; I got results. And 100% of those people - there wasn't a single decenter - 100% of those people said: 'I would absolutely recommend to everybody that I know that they start doing this immediately and I'm going to keep doing it in my life from now on.'

And the results that have come in... You've got to understand we just released this thing in the last month. But the results that have come in are everything from Parkinson's disease to depression to 'I just don't have any energy and now I feel like I'm 20 again', to clarity of thinking, to a whole different attitude. One person said: 'It's like I've put on different glasses. It's like before I was looking at my life through dark-colored glasses and now I'm looking at my life through rose-colored glasses but I realize they're actually clear glasses, because I'm seeing the truth. It's just that I

have seen the negative for so long.'

Just all kinds of things all across the board. I's been really, really humbling and wonderful.

Darius: Okay. Everyone send in your questions for Dr. Alexander Loyd and what the master key is about if you have any questions. Okay. Do we need to ask...? Someone from Portland... As we do the prayer, do we need to ask that the frequency be changed? Do we need to know the event that caused the destructive frequency? Great question from Portland. Two questions there.

Alex: Yeah, the answer is no you don't.

Darius: Okay.

Alex: You don't need to know. And the best prayer I think is always the simple, sincere prayer from your heart. That is not required for this to work. I just pray all the time. I pray every time I'm doing anything and there have been some wonderful studies done on prayer that have found it to be miraculously effective. So I always say pray. But if you did not pray and just pushed the PLAY button it would still work, because that's what we did with the people that we tested it with. But just an honest prayer from your heart, and no, you don't have to know the originating issue.

Darius: So unlike things like hypnosis where you may have to go back in and really try to uncover what it was and all that, basically because this is functioning on the level of sound and words and images we're really just changing the frequency. We're not changing the frequency by going in and trying to resurrect or reframe or change kind of... It's actually happening on a much faster basis because, as you said, it's like a master key.

Alex: That's right. Yeah, we're not taking any bone or blood or tissue and we're not trying to get you to start thinking differently. We are changing the programming for how you think. That's the difference. It has nothing to do with willpower. You don't have to try to do anything except put on the headphones and push PLAY.

Darius: You know, I was reading this thing by Dr. Nessler that you shared. *The diseases that show up later in life could be due to negative memories programmed into your cells as you age. Cancer can be considered the result of bad cellular memories replacing good ones. Psychological trauma, addiction, depression may all be link to such abnormal memories inside the cells.*

You know, as I hear that, I mean, it's kind of a little... I mean, it's a little bit concerning that... How do know? And maybe can you help us. How do we know whether we may have certain energies or negative cellular memories so we don't later have a challenge come up? What are some signs or some things that you've seen when those things are present?

Alex: Yeah, that's a simple one. Let's say that you went to a gas station that was having some problems with their tanks and you got some bad gas, some gas with a lot of junk in it, and your car was sputtering and smoking and it was jerking back and forth and you were having that thing were you turn the key off and it keeps running for a

minute and then there's this bam, you know. So you take it in and a really experienced mechanic asks you a few questions. Okay, what's it doing and when's it doing that? And when did it start and whatever? – and I'm using this one because I've had this happen recently.

And that guy didn't need to hook it up to anything unless you just want to confirm it and pay him 200 bucks for the diagnostic.

Darius: Right.

Alex: He'll tell you: 'You know what? I think you've got some bad gas.' Well, it's the same way with this. If you're having negative thoughts, negative feelings, negative emotions; if you're doing behaviors that are self-defeating rather than leading to your success; if you're having health problems; if you're not as successful as you believe you're capable of being, then something's wrong.

Again back Dr. Leaf. We don't have mechanisms in us for that. The only mechanisms are for success, health, happiness and great relationships. So if that's not what you're experiencing you've got some bad gas, or in this case you've got some destructive cellular memories, you have chaotic hertz in your mind in the form of negative emotions, thoughts and actions, or you have negative hertz in your body in the form of health problems.

So if you're experiencing those, you've got a problem whether you know about it or not.

Darius: Yeah, and I want to be clear not to say that that's going to become something really degenerative later on, but it may be that you're frustrated or you have life regrets, or you're just not really vibrating or maybe being as abundant as you really want to be. I mean, there's a lot of different ways these things can manifest inward and outward, and I think we can all definitely agree with that at all levels.

Quick question as well. So as we look at this situation, tell me about what it's done for people or what you're seeing for people that have like a financial challenge. I mean, it sounds like everything is going to have a root and it's going to be manifesting – at least my belief - you know, through physical issues such as disease, illness, lack of energy. It's going to be maybe manifest for some people as a financial challenge, or relational challenge. Have you seen in the financial area changes that happen with people with this?

Alex: Yeah. We launched this about a month ago and I've had three people already that have contacted me and told me of concrete situations in their life where they had never been able to do anything to break past where they were, which was a struggling month-to-month... Every month or are we going to be able to pay our bills? I keep thinking I'm capable of so much more but I keep sabotaging myself. I just can't seem... And I have had three people - separate three people - they don't know each other - all contact me within a month of when we first launched this, telling me that was absolutely obliterated in a matter of days or a couple of weeks and they are starting to see success they've never been able to approach.

One of them is in the sixties, so he's been trying everything he can find to do this, you know, for 40 years. I think was one was in his... two of them may have been in their forties. And during the testing period, that five-and-a-half years, we had a number of people who reported that was their main benefit is that they've become much more successful and it seemed like all the impediments and blocks just sort of fell away. They really couldn't pinpoint anything they were trying to do differently; they were just doing things differently. And it was almost like they were watching themselves, you know, from a third person perspective saying: 'How did I do that? I've always tried to do that and I've never been able to do it. But I just did it and I'm doing it without resistance.'

Darius: Yeah. Tell me about the harmonious energy and chaotic energy. I'm looking at picture on this special page you have and there's a picture of a finger... looks like a fingerprint or the index finger, and it's harmonious energy. It's this huge like white ring. It almost looks like a halo just spreading out around the base of the finger. And then the chaotic energy looks almost like a storm. It's like small and it's got dark edges.

Tell me about the difference there between those energies. Do those communicate? Like do the cells actually receive that energy that we're putting out?

Alex: Yeah.

Darius: Is it something that communicated across the body?

Alex: Yeah, those are Carillion photographs of a person's fingertips when they were thinking an angry fear-based thought or a love-based thought. And you can see visually the difference in that. I mean, that's a picture of the fingertip, but what it really is is a picture of what's happening at a cell-by-cell level all over your body.

Most people by now are familiar with Dr. Emoto's wonderful book *The Hidden Messages of Water* and what he did where he wrote the word HATE or ANGER on the outside of a vial of water and then he would write the word LOVE or JOY or HAPPINESS on the outside of a vial of water. He would freeze the water, slice off a piece and put it under a microscope, and the water that had the word HATE or FEAR or something like that... And you've got to imagine this. This is just written on the outside of the glass. I mean, written it on paper on the outside of the glass and it actually changed all of the water molecules in the entire vial and the picture under the microscope of the fear-based word looks distorted and diseased and dark and gray and splodgy. The picture of the water that had LOVE written on the outside looks like gorgeous white, beautiful kaleidoscope snowflakes.

Well, that's what these words and thoughts and chaotic hertz are doing to the molecules of your body. The Institute of HeartMath did another one were they would have people hold a vial of human DNA and say a word like HATE or ANGER or LOVE or JOY or HAPPINESS. And what they found is that when they analyzed it under the microscope, when people said the positive word, it had a de-stressing effect on the human DNA. When they said a negative word, it had a stressing effect on the human DNA. And that makes us think, 'Okay. Well, why don't I just go around and say any positive words?' Doesn't work...

Darius: I agree.

Alex: Because your unconscious blocks it. It protects these memories that are the trauma memories because they served as an early warning defense system. You have to have the technology to get by that in order to make lasting change.

Darius: Yeah. And, you know, that's such a key point that if we said words or we try to think positive, if we have this unconscious program, it's basically blocking this from getting to that deeper root level issue, that deeper root level cellular memory. It's locking it in place and so we just don't reach it. And there's a lot of people asking: 'Well, why haven't certain things work for me? Why haven't things come together even though I've been doing spiritual practice?' And the truth is really simple. You haven't gotten to that root yet. You might be making it actually more difficult for yourself because you haven't reached it.

Now, Michelle is somebody in Las Vegas. She's been having some challenges. She says: 'I'm empathetic – empathic.' I'm sorry. She's empathic, a very intuitive person, and she said she's been experiencing a collective dark night of the soul for a few months. 'Would the master key be able to unlock collective chaotic frequencies, the ones that I've been suffering with?'

Alex: I believe it absolutely would. Absolutely.

Darius: She's experiencing a lot of heaviness, a lot of consumption, like the energy is consuming her, and she's very dark.

Alex: Yes, I absolutely believe it would. The only way to know is to try, but we've had so many people with situations similar to that and we really haven't had anything negative or anybody saying this doesn't work. That's what we haven't heard. What we have heard is about everything you can imagine.

Darius: You know, I want to talk about the imaging part, because, you know, there's three stories here. There's a story of the sound, which is these forgotten frequencies. There's the story of the words that is mind-blowing to me, coming into a dream from a child and the effects that you've been seeing and that people have seeing with these words, but then there's the images. I was reading about some of your studies done at Michigan State University where researchers found that positive imagery could improve certain white blood cells and...

Alex: Right. Killer cells.

Darius: Killer cells, right. Tell me about how images do that. I mean, is it going through our eyes? And then of course how do you know? How does the mind know, or the spirit know what images? Are they certain types of images that are just like universal language or master key, as you said - obviously they are - to the soul in this high ordering?

Alex: Well, just like everything else in the universe, every image has a frequency. And we can feel that. We can feel that. If you're listening to this at home after this program's over, all you've got to do is close your eyes and remember a memory that's still very painful for you. Now, you don't have to do it long, because real quickly you'll start

feeling tightness in your chest. You may start experiencing a headache. If you keep thinking about it long enough, you'll start to feel sick. It'll happen every time.

Then think of a memory that is very loving, happy, one of the happiest, most loving, accepting memories of your life and you'll feel the opposite. You'll feel lightness. If people are looking at you while you're doing that with your eyes closed, they'll get tickled because you'll start smiling real big and stuff and they won't know what you're thinking about, and you don't even know you're smiling. You do it automatically.

So what you're experiencing from those memories are either chaotic hertz and frequencies or harmonious hertz and frequencies that every image carries a frequency. So the negative chaotic images that are in you, we call those our memories, and you already read what Dr. Nessler said about the destructive cellular memories and what they can do. They can mean the difference in life or death. Well, that's a chaotic frequency. It's a chaotic hertz frequency. It's a low vibrational frequency and again 8th Grade Physics. The higher vibrational frequency can neutralize that and that's what the images that we give you are. They are very high vibrational frequencies in an exact order that correspond to those perfect words.

Darius: Wow.

Alex: We call it the Trifecta Effect and that you really can't get this kind of healing and transformation and experience without the Trifecta Effect. You need all three, not just one.

Darius: Quick question that's coming in from Julie. She's asking: 'How many times do you do this? Do you do it once and then you're done? Do you continue doing it? Or is it something that you do monthly?' What would be the schedule, I guess, to use this?

Alex: I would advise to do it every day. You can do it 10 minutes a day. I would for sure do it every day until you've healed everything. Now, I would recommend to keep doing it even then, but at least do it every day at least 10 minutes until you've healed everything. Then it's your decision. If you want to break it off then, that's fine, but it works wonderfully preventatively too, so that's why I would continue it.

Darius: Okay. Really quick let's talk a little bit about how people can go deeper. Do you have five minutes? Or how much...? What are we...?

Alex: I've probably got two or three.

Darius: Okay. No problem. What people can do to go deeper into this new technology and how they can use it?

Alex: Yeah. Well, the program that we're offering is everything that you need in order to do that. It's I think 15 or so recordings, some of them audios, some of video. We don't just give you one and two and then say: 'Okay, come back when you need to buy more.'

You start with one and then you go to another one, and then go to another one. And they're all different. Some are audio, some are video depending on if you want to

look at the images or if you want to look at them in your own imagination. Some people like to do one, some people like to do the other. But that's all you need.

There is an advanced master key and it is something you would do after doing this for at least 40 days. You don't have to have that. It's more intense than the first one. You don't have to have it, but that's all we have that, that and the advanced. We don't have 10 or 12 different packages like other people in this field do. It's just those two.

Darius: Okay.

Alex: But the basic comes with everything you need – all the audios, all the videos, a one-year no-questions-asked money-back guarantee for any reason. We want you to already have the results before you're committed to the purchase. We have three times a week coaching.

Darius: Wow.

Alex: There's live group coaching that is available to you. You can ask questions and have them answered. We don't want to just say: 'Hey, thanks for buying that. We'll see you later.' We want to walk with you and make sure that you get the results that you're buying it to achieve. So we'll help you do that. But if for any reason in the next year you feel like it's not happening for you, hey, no questions asked, every penny back.

Darius: Wow. Well, thank you, Dr. Alex, for being here and sharing these incredible discoveries and what you've done with these three breakthroughs. There are some bonuses here as well. I can run through those. There's a poverty consciousness destroyer.

Alex: Right.

Darius: Rewiring your financial thermostat, a new conscious blueprint and success from A to Z. I know you've got to run, but any thoughts on those?

Alex: Yeah, that it a four-part audio coaching thing with me specifically geared toward using the master key to create your perfect success and it goes into way, way, way, way, way more detail than we've had time to talk about today and I think it'll be really, really helpful for you. I tell you, I can't really put into words... I searched for this for more than 20 years. It took me more than five to develop it into a technology. And I am just so tickled today and excited that we can do this now.

I mean Nobel Prize-winners from Albert Einstein to Dr. Oz have been saying someday we're going to figure out how to do this kind of stuff with energy. And we've got it. We're there. We've got the tools now that our grandparents and parents never had and it just tickles me to death.

Darius: So I'm going to remind everyone. This is at www.youwealthrevolution.com/alex2013.

Now, Dr. Alex, I mean, one of the things that I think is astounding about this program is it really is, from what I can see and being in this space for so many years - 17 years for me - this is the first time these three elements have been bridged together,

I mean, ever, right?

Alex: Yeah, it is. And, you know, that's what's so exciting to me too, Darius, is, you know, you think about all the times in history that you could have lived and no matter which segment of history you lived in there would be problems. There would be health issues, there would be relationship issues, and there would be success and achievement and being able to do in your life what you want to do from that perspective.

Well, for the last 100 years in history – it started with Albert Einstein in 1905 and then Nobel Prize-winners from then until 2007, and then in 2007 you've got Dr. Oz, saying on the *Oprah* program, you know, we're there.

This started with Einstein. This is the next frontier. It's not going to be in the future about your body chemistry. It's not going to be about the bone and blood and tissue. We've finally moved into a time where we're going to be able to fix these problems and become successful by healing these things at their source, which is always energy - always has been – but we just didn't have the technology to do it.

And, Darius, we're in that time period now. In all of history this is the first time period we've had the technology to do this stuff. So to me, man, it's like jumping up and down. I'm just so glad that I live now. I mean, yeah, I would love to have been able to do these 25 years ago, but we didn't have the technology 25 years ago, or even 10 years ago.

So you're right; it exists for the first time in history and at least for now only with this master key program.

Darius: Wow. Wow. And I want to share this. I mean, Dr. Alex has put together on the page some different things you might be feeling, because this idea that we talked earlier on of chaotic hertz where these energy vibrations in your cells that are coming from emotional memory, cellular memories and feelings that could be creating in you the life that you don't want, that could be creating illness, could be creating disease, could be creating this chaotic turbulence, this chaotic hertz, that's not in your best interest as a divine enlightened being. I mean, they really will keep you from the life you want to live.

There's even a checklist here of sorts that tells you, okay, if I'm feeling this, this could be a sign that this is something that I need. So if you're feeling more anxiety, higher stress levels, anger towards others, jealousy, content, envy, getting sick more often or longer recovery, worry about the future or past that you can't change, overindulgence in food, drink, sex or shopping, feeling trapped, helpless and alone, struggle getting through the day, can't get out of bed in the morning, can't fall asleep at night, come down with life-altering disease or disorder out of the blue. And I want to say this, Dr. Alex. When that last one happens, I mean, that's when you don't want... You don't to wait that long. You just don't.

Alex: Yeah, you're absolutely right. And all of those things leading up to the last one are warning signs. Remember, we do not have any mechanisms for the negative. So if you're experiencing negative thoughts, negative feelings; if you've got stuff coming

from a place and you don't know where it's coming from but you just feel this stuff; if you're having aches and pains and problems in your body... We do not have mechanisms for the negative. Those are malfunctions. Those are negative chaotic hertz in your spirit, mind and body and you are absolutely right. Please don't wait until that last one. I mean, we can still help you then, but let's not have to go there.

Darius: Wow. Wow. Okay, let's do this really quick. A few people were asking about what's in the program, what's not. Maybe we can just walk through some of that.

The first piece I'm seeing is the digital wave frequency recordings. These are custom-engineered using the technology and all of that blending of what you discovered together, correct?

Alex: That's right, that's right. And they come in all sorts of different combinations. You can listen to ones with like nature sounds, different nature sounds to find the one that is most comfortable and most soothing to you. They all have the 528 hertz miracle frequency. They have the words.

Now, they're recordings where we had professional actors and actresses, men and women, do the words who were really awesome at doing those words. But if you'd rather do the words yourself there's also recordings without someone else doing the words and you can do them. There are ones with images – the videos, the HD videos - where we have the images if you'd rather do it that way, or some people would rather imagine the images in their own imagination. That feels more powerful to them.

So you have every different option you could ever want and it's all included in the package. None of it is an extra cost or here's two and when you need another one come back. It's all in the package for you.

Darius: Does it matter...? You know, one person was asking does it matter how long they've had these chaotic frequencies, this chaotic hertz; how long the challenge has been there - 50 years, 60 years, maybe their whole life and they're older now? Does it matter how long it's been there?

Alex: No. In that 8th Grade Physics realm of a negative chaotic hertz frequency being canceled out by a positive chaotic hertz frequency, it makes no difference if it's a minute old or 100 years old.

Darius: So this is canceling it out. But there's a lot more going on you're here too, because you've got the words, you've got the miracle frequency 528 hertz, you've got the images that are... It's just incredible. I want to share again. It's at www.youwealthrevolution.com/alex2013.

There's even - I want to say this - a payment plan, right, for people that want to get access to it? You've got quite a few different options here. Tell me about the options. There's a digital version and then there's a digital and physical copy. But you even have payment plans to make it easier for people as well, right?

Alex: Yeah, right. And the comparison I like... I'm taking a nutrition right now, Darius, that's \$50 a month for one person. I have four people in my family, so that \$200 for one month for my family and I to be on that nutrition. Now, if we want to keep doing that it's \$200 every month. The master key with all of those recordings that cost us hundreds of thousands of dollars to engineer and test, reengineer over five-and-a-half years, test them with test groups, get their feedback, go back and do it again... All of that, the theta accelerator that puts your brain in a relaxed state, the binaural base that Dr. Oz and Dr. Alexander talked about on their show just recently, all of it - all of it - is included... I think it's \$149, \$147, \$150...

Darius: \$147.

Alex: For all of it. That is one time for the rest of your life, ladies and gentleman.

Darius: Wow.

Alex: That's not a month. That's not per year. That's not, okay, you get this one and then there's 12 levels of this, so every level we'll sell you another 150 or 200 bucks like other companies. No, no, no, no, no. This is the whole enchilada, everything you need for life.

Darius: I love it.

Alex: You can pay for it over three months, which is I think...

Darius: \$49.

Alex: \$49 or about... Here's a good way to think about it if you do the payment thing. It's about a \$1.50 a day for three months, for the rest of your life.

Darius: I don't even think you can get Starbucks for that much.

Alex: Oh, no. Starbucks is way more than that. You have to go to Dunkin' Donuts.

Darius: Yeah. Wow. Wow. And it's just for three months.

Alex: For three months.

Darius: \$147, or \$49 a month for three months. And, like we're saying, it's less than a Starbucks a day, and really that's not going to give you what is going to really heal and what's really going to open up and what's really going to give you the gift of the divine that this is.

I'm still just astounded at how these three puzzle pieces came together. I mean, I've got to just go back through the interview, the story of that little girl or that little boy in the dream. I listened to that with my wife last night and we were so just riveted, and then the miracle frequency and then the images that are corresponding to those words, and then bringing all of that together with the binaurals so it really gets into the brain. I mean, it's just going to be an incredible ride and journey.

Really quick. There's another option for people. That's the digital plus physical copy and bonuses. So really quick, Dr. Alex, why would somebody want the physical copy

and then what are the bonuses?

Alex: Yeah, there's really just one reason and that would be if you want to download this onto like every electronic device you own, you know, even your smartphone and your iPod and all that sort of thing.

Now, what I'm told by techy people - and I'm kind of an anti-techy person - but what I'm told by techy people is that some people know how to do that or can figure out how to do it with the digital version, but most people like me need the hard copy to make it really, really easy.

So that's what the hardcopy is for: if you're not techy and you want to make that really easy to download to your iPod and all that sort of thing. And the other reason to buy the digital would be to get the four bonuses...

Darius: Right, and then physical...

Alex: Because they're awesome. They're awesome. And can I make one other comment, Darius, about what you just said?

Darius: Sure. Yeah.

Alex: You said thinking about all the years for those puzzle pieces to come together But, you know, that's looking at it from now when it is together. I've got to tell you during those 15 years there were a bunch of times I thought: 'I'm never going to find all these pieces.' I can't tell you all kinds of different word combination I tried and none of them worked. I had no idea. It's probably 150 different times I thought I'd found words or hear some words or in an ancient manuscript there's words or I just thought of: 'Okay, what are the most powerful words?' And it never worked. Found images; was looking for physical frequencies to heal cells in the body and all that sort of stuff.

All of this stuff coming together into one pushbutton program over 20-plus years, to me - now, I know I sit in a different seat, but to me is a miracle.

Darius: Yeah.

Alex: And that's why I get so excited about this, because it's a miracle that I'm so thrilled to share.

Darius: Wow. Wow. Absolutely incredible. It's at www.youwealthrevolution.com/alex2013. I know we've got to run. I know we've gone long. Any quick things on the bonuses, because you've added those in there and they look incredible? Rewiring your financial thermostat, poverty, consciousness destroyer, the new conscious blueprint, and success from A to Z. These are bonuses you get if you decide to get the other package, which is digital plus physical and bonuses, that's \$197 or just three payments of \$67 - so it's like \$20 more each payment - not much. Tell me about the bonuses that come with that.

Alex: Yeah, I'm really fired up about those. I spent a lot of time working on those things and putting those together, and a lot of that information that's in those bonuses is nowhere else in the master key program. It's not in the videos, it's not in the

instructional videos, it's not in the manual. It's extra stuff, but I think it'll take you to another level.

The rewiring your financial... I'm sorry, the poverty consciousness destroyer is how you can quickly and easily deprogram and remove your computer virus, so to speak, or a human hard drive virus from any issue you have related to success. The rewiring your thermostat is once you've deprogramed that and removed the virus, okay, now we need to put new software in and it's the fastest, quickest way to do that.

And then the new conscious blueprint... There's a 97% failure rate in the self-help industry going back 65 years and based on the new research out of Harvard and Stanford we now know why and what has to happen to have a conscious blueprint that works every time. And it is that and detailed. There's nowhere else in the program that shows you once you have deprogramed and reprogramed with the master key, this is the blueprint you overlay onto every action, every behavior, every decision, every problem, every day of your life to create and find the perfect solution every time.

And then the last one is success from A to Z, which is extensive Q&A and taking you by the hand from the very start, knowing nothing to getting to where you're trying to get to.

Darius: Wow. Wow. All of that's there. Just incredible. So just to reiterate, if you want to get the digital version it's \$147 today and there are three payments of \$49 if you want to do it that way, and you'll get access to everything or do they have to wait until the last payment goes through, Dr. Alex?

Alex: Oh, no, no, no, no, no, no, no. You receive everything right off the bat. We want to bless you with that, and remember this no-questions-asked guarantee for a year. We want you to already have the results before you're committed to the purchase, and that's what's been happening to people all over the world.

Darius: Wow. Fantastic. Well, thank you so much for being here. I'm going to share again. This is available digitally. Right now you can have it. You can begin using it. Where would people begin, Dr. Alex? A lot of people asking is it all in order? Do I start with Number One and then it starts opening and healing as I go, or do I need to make a choice and pick different ones?

Alex: The first thing you'd need to do is watch the Get Started Quick video.

Darius: Okay.

Alex: And it tells you exactly - step one, step two, step three, step four - which recording to start with, the whole nine yards.

Darius: Wow. Fantastic.

Alex: We've taken care of all that for you.

Darius: Oh, that's great and it is here, so if you guys are interested and want to go deeper... I'm going to be going deeper as well. This is something me and my wife looked over this as we got it early on and I am very excited. I am absolutely captivated and riveted with these technologies and some of how they came to be and what the effects will be all put together.

As Dr. Alex said, the You Wealth Revolution is the first place that this has been offered. He's already had incredible stories. We shared them coming in. So it is only going to get better and better and better and more exciting for all of us and it's just our honor to bring incredible technologies like this to the world.

Dr. Alex, any final thoughts or anything else that you really just want to share with the group?

Alex: I think I already said it, Darius. You know, if we live 50, 75, 20 years ago we would see what these Nobel Prize-winners had been predicting, and Albert Einstein, and we'd have this problem and think: 'Man, I wish I could fast forward 10 years or 20 years until we figured out this technology that Einstein and these Nobel Prize-winners were saying we're going to have someday that will make me able to heal this problem and its source.' You don't have to wish for that anymore. It's here.

Darius: Wow. Wow. And this comes from a man who through his work has healed thousands and thousands of people, so this is a much more powerful version of that and much deeper and at many different levels.

So it's at www.youwealthrevolution.com/alex2013.

And I want to say this to everybody. You know, it's an honor for me to be in the space where when these breakthroughs come in - and to me this is a huge breakthrough - that I'm able to be one of the first platforms that gets to share this, one of the first people that get access to it. And then all of you like friends and family I get to say: 'You have to come and see this. You have to come and work this. You have to come and use this and feel it.' You know, that to me just is so special and so that's what this is about. Use it, experience it. You know, there is a life that you were born to experience. There is a you that's been waiting to come forward. There is a self that's been waiting to come out into this world and it is free of the pain, of the fear, of the doubt, of the poverty. It is the divine blueprint of what you were here to do, I believe the greatest version of yourself. It's that part of you that late at night when you're in bed it's calling to you. It's that feeling, that nagging feeling like life has to get better or there's more that I'm here to do or I'm just not really living my passion or purpose. Why am I still stuck?

That part of you wants to come forward. There is a master key to unlock that, to bring it forward. It's in you. It's laying there dormant. Let it come forward and utilize new technologies to do it. Some of them are ancient, some of them are new. They are all going to be combined in a way we've never seen before. Get ready.

I'll be doing it and sharing my results, and I look forward to seeing everybody here at the You Wealth Revolution as well. Write in and tell us what's going on with the master key system by Dr. Alexander Loyd's technologies for healing.

Much love, everyone. I love you. I believe in you. Thank you for being here. If you want to go deeper it's at www.youwealthrevolution.com/alex2013.

Much love. We'll see you on the next You Wealth Revolution session. Bye-bye, everyone.
